MONTHLY STATISTICAL BULLETIN

of the
Unemployment Compensation Division
and the
Employment Service Division

A Factual Presentation of
Unemployment Compensation
and Employment Service Ac-
tivities and the Results
of Investigations and Re-
search Studies in Florida

MAY 1941

FLORIDA STATE LIBRARY

Prepared and Published Monthly by the Department of Research

I M P O R T A N T N O T I C E !

The Research and Statistical Department has under consideration the desirability of changing this publication from a monthly periodical to a quarterly periodical. However, the ultimate desirability of changing the timing and the period covered by the Statistical Bulletin depends upon its utility to its readers. Any person desiring to have the Statistical Bulletin continued on a monthly basis should inform the Research and Statistical Department of the Florida Industrial Commission to this effect. If there is not a sufficient number of readers who wish the Statistical Bulletin continued on a monthly basis it will be converted to a quarterly publication, effective for the Bulletin covering the data for the second calendar quarter of 1941.

STATE SUMMARY OF OPERATIONS EMPLOYMENT SERVICE

	APRIL 1941	MARCH 1941	APRIL 1940	PER CENT CHANGE (APR. FROM MAR.)	PER CENT CHANGE (APR. 1941 FROM APR. 1940)

REVIEW OF EMPLOYMENT SECURITY ACTIVITIES

EMPLOYMENT SERVICE

The active file of registrants for jobs with the Employment Service continued to increase because of the National program to register all workers who might be available for referral to jobs connected with National defense construction and production. Most of the additions to the active file continued to be new applications, i. e., the registration of workers who had not previously registered at that local office.

Although the number of placements continued to decrease during April because of the tapering off of National defense construction and because of the normal seasonal decline in business activity in Florida, the number of job placements during April 1941 were substantially above the number of workers placed in jobs during April 1940 (47.4%). The number of placements indicates that business in Florida is receiving a substantial stimulus from National defense production. More placements continue to be made in construction than in any other industrial division. The increased placements as compared to a year ago are reflected in all age groups.

UNEMPLOYMENT COMPENSATION

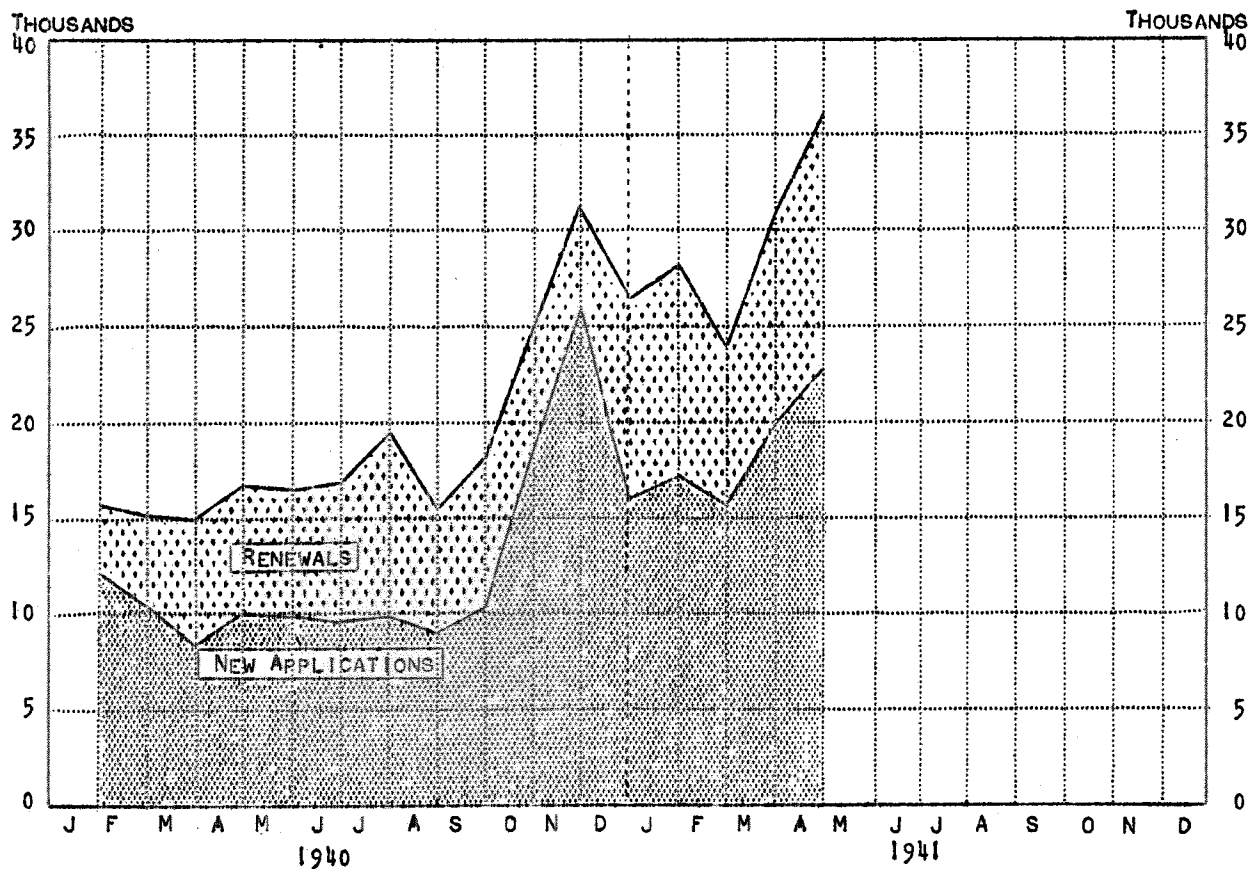

The increase in benefit payments during April was very slight as compared with the increase in payments for the same period last year and in addition the amount of payments during April were almost \$100,000 less than benefit payments during April 1940. Additions to the funds available for benefit payments were more than twice the amount of benefit payments during April. The total funds available for the payment of benefits at the end of April were slightly in excess of \$13,500,000.

The number of initial claims filed during April were 67.8% greater than the number filed during March. Moreover, they exceeded the number of initial claims filed during April 1940 by 8.2%. However, the number of claims disallowed during April reached an all-time high when 56.7% of the initial claims processed were disallowed, 50.4% because of insufficient earnings. Therefore, the number of allowed claims during April 1941 were less than the number of allowed claims during April 1940.

VETERAN ACTIVITIES

During the month of April there were 1,120 new applications of veterans taken in the Florida State Employment Service offices. This total exceeds that of any previous month to date. Miami took the greatest number, 266, of these new applications; the total gain over the previous month is accounted for mainly by this one office. Jacksonville and Tallahassee were the only other offices to take over 100 applications.

Renewed applications also reached a new high of 670. Arcadia with 107 and Miami with 195 accounted for almost one-half of the total.

Despite a seasonal decline in the total number of placements, the number of veteran placements continued on the March level. The 116 placements are fairly well distributed among the various local offices.

The active file of veterans reached an all-time peak of 5,484. This figure is 5.5 per cent of the total active file--veteran and non-veteran--on April 30. On December 31, 1940, the veteran active file was only 3.6 per cent of the total active file of the State. Three offices, Jacksonville, Miami, and Tampa, accounted for approximately one-half of the total number of active registrants.

The continued high level of veteran registrants the past two months is attributed to the special statewide registration program which was conducted between March 15 and April 15.
